

Sir LiftAlot

The best man to assist you on site !

*The best man to hire, great strength and easy to use. With this extra horse power you just can't lose.
Together to great heights, without struggle or fight. Always on time, small and light,
The best man to assist you on site !*

Sir Liftalot began his crusade through Europe, a crusade for the belief in the importance of reducing manual lifting and improving working conditions by using the "Gevelridder" or Knight, a quick and easy to use lightweight aluminium manual lifting machine, with a capacity of 250 kg and extendable to 10 meter. During his crusade he has experienced much opposition from traditional Knights, they would rather lift with their bare hands, but still he manages to convince more and more Knights to follow him. Will you also follow Sir Liftalot on his crusade..... ?

The Sir Liftalot "Gevelridder" is late '80s developed by Piet Ridder. His goal was especially for the construction sector to develop a product that could lift heavy objects easily. Because he himself was a carpenter he had the experience how difficult and risky it was to hoist frames and glass to the first floor. Mr. Ridder has won several awards for this innovation and this was many times guest in TV programs. The product has gained notoriety in the market over the years for his friendly benefits for Health and Safety. The Sir Liftalot "Gevelridder" contributes to workplace safety and deprives heavy lifting.

Mister Ridder died in August 2014 after this the company has made a new start. According to the last wish of Mr. Ridder, the company made a new start under the name Gevelridder BV the product Sir Liftalot "Gevelridder" was further developed. Besides the well-known Sir Liftalot "Gevelridder" the company now has other kind of products add to the range, such as transport cars and vacuum lifters, all made light weight and made from aluminium.

In autumn 2014, the new website www.Sirliftalot.com was presented. The Sir Liftalot products are registered and patented so are only available through Gevelridder bv.
